## IMPORTANT

## VEGETABLE SEED SHORTAGE • 1925

OWING to unfavorable weather conditions all vegetable seed crops are much below normal in quantity this season, therefore we urgently advise customers to place their orders early, as we cannot be bound to prices quoted in this catalog as soon as existing stocks are exhausted.

You will save money, secure the varieties desired and obtain prompt delivery by ordering early.

Asparagus, Washington New Rustless

## Hunt's Vegetable Seeds

Selected and tested strains from the Best European and American Raisers

## Artichaut Artichoke alcachofa

For Artichoke Plants, see page 30

## Asperges Asparagus Esparrago

One ounce will produce 200 plants Pkt. Oz. 1/4lb.
Conover's Colossal. Large, early, tender, prolific; green........ $\$ 0 \begin{array}{llllll} & 10 & \$ 0 & 25 & \$ 0 & 75\end{array}$
Palmetto. Large size and delicious flavor. Produces large green tender stalks
$10 \quad 25$
75

## ASPARAGUS ROOTS

Set out in ApriI, in rows 2 feet apart, plants 18 inches apart and 6 inches below surface. In small gardens, two-year and three-year plants are preferred to seed; they are easier to handle and bring quicker results.
Conover's Colossal. 3-year............................................... . $\$ 350$ \$30 00
Palmetto. 2-year............................................................... . 250 . 2250
Washington. Practically rustproof; produces Iarge luscious stalks of finest quality. Dark green. Strong two-year-old roots of Pedigreed Washington Asparagus
Forcing Crowns. Extra strong. .......... . . . . . . . . . . . . . . . . . . . . . . . . . . . 1500

Beans, Bountiful

## Ilaricots Nains <br> Beans Frijoles

Beans, particularly the Bush varieties, are one of the most satisfactory vegetables to grow. They adapt themselves to practically any condition of soil, succeeding particularly well in the virgin soil of newly made gardens. Successive sowings should be made throughout the season. The crop should always be picked promptly when matured, used immediately or canned for winter. Black Valentine, Masterpiece, and Golden Wax carry our highest recommendations. Sow about May 1; make drills 2 inches deep, and 18 inches to 2 feet apart. Drop the Beans 3 inches apart, and cover not more than 2 inches. Sow every two weeks, up to the end of July, for a succession. Immediately the pods have attained a fair size they should be removed, for the over-development of a few Beans wiil soon cause the plants to cease bearing.

## Dwarf, or Bush Beans one pound (cre tint) will plant <br> GREEN-PODDED

NOTE-Beans, Peas, and Cown are offered by weight instead of measure: One pound is almost equal to one pint.
Black Valentine. I ong, round, solid pods. Valuable for forcing Lb. 5 lbs. 10 lbs. or garden; heavy cropper. On account of its hardiness, may be planted much earlier than other varieties
$\$ 0 \quad 40 \quad \$ 1 \quad 75$
$\$ 325$
Bountiful. One of the best green-podded sorts. Excerdingly early and prolific; long green flat pods
$45 \quad 200$
375
Carter's Magpie. Very prolific; pods Iong and tender. Especially fine for forcing........................................ 110040400750
Early Mohawk. Long flat pods; hardy; early, productive....... $40 \quad 1 \quad 75 \quad 325$
Earliest Red Valentine. Ready to pick in 35 days; tender, and of fine flavor.

## Hunt's Perfection Vegetable Seeds

## GREEN-PODDED BUSH BEANS, continued

Extra-Early Refugee. Large and tender; L.b. 5 Ibs. 10 lbs . productive; early.................... $\$ 0 \quad 35$ \$1 35 \$2 50
Longfellow. Extra early; flat green, tender and stringless.

## Lima Beans

Lima Beans should not be planted until all danger from frost is past. Sow bush varieties in drills 2 feet apart, the Beans about 6 inches apart, and cover about 2 inches. For Pole Limas, allow 5 Beans to a hill; plant seed eyes down, 2 inches deep.

## BUSH

Two pounds (or quart) will plant 100 feet of drill
Burpee's Bush Lima. A perfect bush Lb. 5 lbs 10 lbs . form of the large Lima. Pods are enormous, often measuring five to six inches in length. Very productive $\ldots . . \begin{array}{lllll}\$ 0 & 60 & \$ 2 & 75 & \$ 5 \\ 25\end{array}$
Fordhook Bush Lima. Immense pods and Beans. Upright and branching. Of delicious flavor.....................
Henderson's Bush Lima. Early and heavy cropper. Small Beans of fine quality. Very hardy and rapid grower
Dreer's Bush Lima. Pods thick and large, containing 3 to 5 thick Beans. Useful for home gardens on account of its productiveness

POLE LIMA BEANS
Two pounds (or quart) will plant 100 hills
Burpee's Giant-Podded. The Beans are Iarge and thick; pro- Lb. 5 lbs. 10 lbs. ductive...................................................... $\$ 045$ \$175 7525
Carpintera. Large, thicker than ordinary Pole Limas; vigorous grower; heavy cropper
$45 \quad 175 \quad 325$
Early Leviathan. Pods contain five Beans. Early; excellent. .. $45 \quad 1 \quad \begin{array}{lllll}75 & 3 & 25\end{array}$
Ford's Mammoth. Large, long pods. A well known standard variety
$45 \quad 175 \quad 325$
Large White. Old standard sort................................... 40 1 $50 \quad 275$
Dreer's Improved. Early and heavy cropper, of excellent quality

## Pole Beans, Green-Podded

Pole Beans make ideal ornamental vines on trellises or arches adjacent to the vege-table-garden. Try the Scarlet Runner in this way, if opportunity comes. The flowers are exquisite and the matured pods are deliciously tender to eat.
Kentucky Wonder (OId Homestead). Long, green and flat; Lb. 2 lbs 5 Ibs. very prolific................................................... $\$ 045$ \$0 75 \$1 75
Scarlet Runner. Used both as a String and Shell Bean. Produces a heavy crop of tender, stringless, delicious Beans. Lb. 50 cts., 2 Ibs. 85 cts., 5 Ibs. $\$ 2$.

## Broad Beans

Taylor's Broad Windsor. A well-known and productive variety. May be sown as soon as frost is out of the ground. For table use, prepare the same way as Lima Beans. Lb. 50 cts., 2 Ibs. 90 cts., 5 Ibs. $\$ 2$.

## Betterave <br> Beet <br> Remolacba

Sow as early in the spring as the ground can be worked, and every two weeks after, for a succession, up to the first week of July. Soil should be light, sandy Ioam, well enriched with manure. Sow in drills, 15 inches apart, and when well up, thin out to 4 inches.
One ounce will sow 50 feet of drill; 5 to 6 pounds per acre
Crimson Globe. Fine, globular shape; flesh rich, very tender and sweet. For an early crop this is one of the best; and from sowings made as late as July splendid roots may be obtained in autumn and winter. Pkt. $10 \mathrm{cts} .$, oz. $25 \mathrm{cts} ., 1 / 4 \mathrm{Ib} .75 \mathrm{cts} ., \mathrm{Ib} . \$ 2.50$.
Crosby's Egyptian. Rapid grower;
can be sown outside as late as July; Oz . round, dark blood-red............ $\$ 020$
Detroit Dark Red. Sweet and tender; very early..................
Early Blood Turnip. Dark red; fine flavor. Good for winter
Eclipse. Early; round; bright red. Heavy yielder
Egyptian. Flat-shaped; extra early; deep red; tender and sweet
Electric. Extra early; nearly round; bright red

## Hunt's Perfection Vegetable Seeds

## Sugar Beets and Mangels

Six to 8 pounds of seed are required per acre 5 lbs.
Giant Intermediate. Heavy cropper.................................... $\$ 100$. $\$ 450$
Mammoth Long Red. Largest and heaviest.............................. 100 . 100 4 50

Yellow Tankard. Very heavy cropper . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 100 . 450
SUGAR BEET, Klein Wanzleben.......................................... $80 \quad 350$

## Chou vert Frise Borecole, or Kale col

Sow seed $1 / 2$ to 1 inch deep, in rows 18 inches to 2 feet apart, and thin plants to 2 feet apart. Borecole is always improved in quality by mild early autumn frosts. Sowings should therefore be made in May and the plants transplanted in July.

## One ounce of seed will sow 100 feet of row

Dwarf Curled Green Scotch. Very dwarf and spreading. Pkt. Oz. ${ }^{1 / 4 \mathrm{lh}}$.
Leaves densely crisped and curled. Hardy and productive.. $\begin{aligned} & \$ 0 \\ & 10\end{aligned} \begin{array}{llllll}\$ 0 & 20 & \$ 0 & 75\end{array}$
Langport Crested Frostproof. Has long, narrow leaves, closely curled. It is a half-dwarf variety and is very hardy.

5 pkts. \$1.. 25
Tall Green Curled Scotch. $\begin{gathered}\text { Heavy cropping sort. Should be } \\ \text { grown extensively where winter greens are in demand......... }\end{gathered} 10 \quad 30 \quad 100$
Sponge Kale. Distinct, resembles a finely honeycombed sponge. Easily grown; almost equaling Asparagus when cooked

1550

## Chou de Bruxelles Brussels Sprouts Berra de Bruselas

Sow seed in April in seed-beds; transplant afterward into rows 2 feet apart, and cultivate like cabbage.

One ounce of seed will produce 1,500 plants
Dwarf Gem. Produces compact sprouts of superior quality. Pkt. Oz. 1/41b.
Buttons remain fine for a considerable time................... $\$ 010$ \$0 50
Dalkeith. Produces Iarge, solid sprouts of finest flavor......... $10 \quad 40 \quad 150$
Long Island Improved. Grown extensively for New York markets. Heavy cropper. The plant is tall and covered with firm sprouts from top to bottom
Prolific Exhibition. Very fine, even-shaped Sprouts of good size and flavor; splendid for exhibition
Skirbeck Favorite. This variety produces Sprouts of excellent
quality from the tip of the plant right down to the ground.
$10 \quad 50 \quad 175$

## William M. Hunt \& Company

Cauliflowe:, Extra-Early Snowball

## Chou Fleur Cauliflower Colifor

For early varieties, sow seed in hotbeds during January or February. Transplant 2 to 3 inches apart, to flats or cold-frames; set out in open ground $21 / 2$ feet apart as soon as weather is suitable. Thrives best in loamy soil. Water freely during dry spells. For Iate Cauliflower give same treatment as late Cabbage.

One ounce of seed will produce 2,000 plants
Dry Weather. Later than Erfurt; pure white of fine quality; Pkt 1/4oz. Oz withstands drought better than other sorts. Heads grow to a very large size, solid, pure white, delicious flavor.
. $\$ 0$
02
$\$ 125$
$\$ 450$
Extra-Early Snowball. The best for forcing under glass or for open ground. Extremely dwarf; early; producing wonderful white heads. Very choiçe imported strain

150
500
Improved Erfurt (Earliest Dwarf). One of the earliest and most desirable. Small-leaved dwarf variety

150
500

## Cerfeuil Chervil Perifollo

One ounce of seed will sow 150 feet of drill Pkt. Oz. 1/4ID.

## Chicoree Chicory Achicoria

## Hunt's Perfection Vegetable Seeds

Cabbage, Premium Flat Dutch

## снои Cabbage col repollo

For plants of early kinds, sow seed in January under glass, and prick out into flats about 2 inches apart. Transplant to open ground as early in the spring as the soil can be prepared. Set out $11 / 2$ feet to 2 feet apart, in rows, which should be 3 feet apart. Cultivate frequently, and during dry weather water copiously. Late Cabbage seed should be sown in drills in open ground during April and May, and transplanted in fune or July.

One ounce of secd will produce about 1,500 heads; 8 ounces will plant an acre
All Seasons. Round, very solid and of the best quality. Mid- Pkt. $\mathrm{Oz}{ }^{1 / 1 \mathrm{lb}}$. season. $\begin{array}{llllll}\$ 0 & 10 & \$ 0 & 40 & \$ 1 & 50\end{array}$
Autumn King. Large, flat heads; fine quality; good keeper. The heads are flat and the leaves set closely
$10 \quad 35 \quad 125$
Copenhagen Market. The earliest round variety; very solid; fine quality; short-stemmed. The largest of the early round headed varieties. Danish-grown seed. Strongly recommended.
Danish Ballhead. Medium size, with few outer leaves; good keeper.
Early Jersey Wakefield. The standard early variety; conical in shape; solid, with few outer leaves. One of the best for private or market garden
$20 \quad 100 \quad 350$
$20 \quad 100 \quad 350$

Early Summer. Large, solid, flat heads of superior quality. A reliable second early variety.
Glory of Enkhuizen. Large, early, ball-shaped heads, fine quality.
Premium Flat Dutch. Well-known late sort. The heads are flat and grow remarkably large

Spinach Beet or Swiss Chard. Giant Chinese. Resembles Spinach Beet or Swiss Chard.
Resembles somewhat Romaine Lettuce. Outside leaves are pale green, inside creamy white. Very mild flavor
$10 \quad 50 \quad 1 \quad 50$

Mammoth Rock Red. Round, solid heads of deep red color.
$10 \quad 60 \quad 175$

SAVOY, American Drumhead. Unsurpassed for winter use; Iarge, late, and finely curled

10 6) 175
Perfection Drumhead. Largely grown for New York market. Produces Iarger and better heads than any other Savoy Cabbage

## Carotte Carrot Zanaboria

Sow seed in light sandy soil, from April to July, in drills $11 / 2$ feet apart, covering the seed $1 / 2$ inch in depth. Thin out the young plants from 3 to 5 inches apart, according to size of variety. Cultivate freely and do not allow the soil to get too dry during hot weather.

One ounce of seed will sow 100 feet of drill; 4 pounds per acre
Chantenay Half-Long Scarlet. Stump-rooted variety, Pkt.
with broad shoulder.
Danvers Half-Long. Large size; smooth, and has Iittle core. Rich orange-red; handsome. Produces very large crops.
Early French Forcing. Small and mild flavored. The earliest Carrot in cultivation. The smaII, globe shaped roots make an elegant and delicious side dish...
Early Scarlet Horn. Very thick roots; fine for frames; popular kitchen variety.

| 10 | 30 | 1 | 00 | 3 | 00 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 10 |  | 20 |  | 55 | 1 |

Guerande, or Oxheart. An immense cropper. Especially suited to hard soils.
$10 \quad 20 \quad 60$200

Long Red Surrey. One of the finest for exhibition purposes. Heavy cropper of first rate quality
$10 \quad 30 \quad 100$
Half-Long Nantes. A popular French sort, adapted to shallow soils.

10
1550
For other varieties of Carrots, see page 9

## ROOT CROPS-"GROW YOUR OWN"

Every home-gardener should devote as much spare ground as possible to the growing of Root Crops. Most of us who garden for pleasure know that the summer vegetables are always cheaper to buy, but the novelty of "growing our own" and having them fresh from our own garden gives them preference over the grocer's stock. Root Crops, however, mature in the fall and can be stored in sand in the cellar for winter and spring use, when green grocers' prices are sky-high. That's the real time to be eating your own. This year, therefore, grow more Beets, Carrots, Parsnips, Turnips, and Rutabagas.

## Hunt's Perfection Vegetable Seeds

## CARROTS, continued Pkt. Oz. 1/4lb. Lb.

The Premier. Excellent both for table and market, being heavier than Chantenay and possessing all the fine qualities of St. Valery ............................... $\$ 0$ 10 $\begin{aligned} & \$ 0 \\ & 40 \\ & \$ 1 \\ & 25\end{aligned}$
St. Valery. A thick, intermediate long red, splendid for kitchen or stock

## Field Carrots

Yellow Belgian. For cattle feeding
40
125

## Celeri <br> Celery Apios

For earliest crop, sow in February under glass, or in heated frames. Prick out, on bottom heat when ready, and transplant to trenches in May or June For main crop sow in March and continue up to July. When plants are large enough, transplant to trenches, preparing same with good rich loam. Water freely during July and August. To grow good Celery it is essential to place at least 3 to 4 inches of rotted manure in the bottom of the trenches before setting out plants. Without it, dwarf, stunted plants invariably result.

## One ounce of seed will produce 3,000 plants

Easy Blanching. A new variety Pkt. Oz. 1/4lb. of Celery with remarkable easy-blanching characteristics and useful both for early use and for keeping during the winter months. The plants make a quick, healthy growth; stalks thick, very tender and brittle; rich flavor............
Fin de Siecle. Largest, hardiest and best keeping ........... golden yellow heart, rich nutty flavor. Easily blanched and fine keeper
$50 \quad 175$
Golden Self-Blanching. French-grown. Crisp; tender; fine flavor

20
100350
Pink Beauty. Very solid and of fine nutty flavor
Pink Plume. Strong, compact grower; Iong keeper. . . . . . . .
White Plume. A valuable early variety unsurpassed for fall and winter use. Blanches easily. Popular market sort. .
Winter Queen. The best white Celery. Very large and solid. Excellent for keeping .
CELERIAC, Large Erfurt (Turnip-rooted Celery). Excellent for soups

Celery, Easy Blanching

## Hunt's Perfection Vegetable Seeds

## Pois Peas <br> Cbicbaros o Guisantes

## English and Northern-grown Seed

For first crop, round-seeded Peas should be sown in the open ground as soon as same is fit to be worked. The wrinkled varieties should be planted about two or three weeks later. Frequent planting for succession, and a careful selection of varieties, will give an almost continuous crop of Peas from June until frost. Sow Peas in rows 3 . feet apart and 3 inches deep. Rotted horse manure and wood ashes should be freely used in the preparation of soil for pea sowing.

Three pounds of seed will sow 100 feet of drill
The beigbt of Peas is influenced by the condition of soil and character of season

## Hunt's Perfection Grass Seeds

## Grass Seed

## How to Make a Lawn

To produce a good lawn requires considerable work; do not make the mistake of trying to cheapen the preparation, for nowhere in the garden is the old axiom of "what is worth doing, is worth doirg well," better illustrated than in lawn-making.

The soil must be deep; a good Iawn cannot exist on thin soil. Plow the ground deeply -a foot is none too much. Apply to the soil before plowing, a heavy coating of wellrotted stable manure. Fresh manure carries too many weed-seeds; its use should be avoided.

If rotted manure is not available, sheep manure or chemical manures may be substituted.

Ground bonemeal, $11 / 2$ tons to the acre, is a good lawn fertilizer, furnishing plantfood over a long period; 100 pounds of nitrate of soda and 100 pounds of dried blood to the acre should be applied at the same time; these furnish nitrogen for immediate use. Sheep manure at the rate of 1,000 pounds to the acre may be used instead of nitrate of soda and dried blood. When only a small lawn is being made, use 20 pounds of bonemeal to 250 square feet, $1 / 2$ pound each of nitrate of soda and dried blood, or 6 pounds of sheep manure. Harrow and cross-harrow until the ground is thoroughly pulverized; the better harrowed the ground is, the better the grass will grow and the more permanent the lawn.

An acre requires 125 pounds of seed or one pound to each 250 square feet. Harrow or rake the ground lightly, and roll with a heavy roller.

## Hunt's Perfection Lawn Seed

This mixture is well worthy the name we have bestowed upon it, and we firmly believe is destined to become the favorite Grass Seed for use where a fine lawn is of importance. It is the result of careful study and trials made during the past few years under varied conditions. In advance of cataloguing Hunt's Perfection Lawn Seed, we sold, privately, several lots of this mixture during the past two years, and in each and every instance the results obtained have been remarkable, quite confirming our own trials and fully meeting our expectations. Those who have tried out this seed tell us that "we have got the real goods for a perfect lawn." Lb. 75 cts., 20 Ibs. $\$ 11.50$, 100 lbs. \$55.

Hunt's Perfection Lawn Seed contains 10 per cent South German Mixed Bent (Creeping Bent).

## Prospect Park Lawn Seed

This mixture is made of the finest American and European grasses specially adapted for lawns. With proper care of the soil before sowing it will produce a rich, velvety Iawn in four to six weeks, which will remain green throughout the year. For making new lawns we recommend 5 bushels to the acre; 1 pound of seed will sow 250 square feet; for renovating use one-half this quantity. Lb. 50 cts., 20 Ibs. $\$ 8,100$ Ibs. $\$ 37.50$, 1,000 Ibs. $\$ 350$.
MIXTURE FOR SHADY LAWNS AND UNDER TREES. This mixture is a combination of dwarf-growing grasses which thrive in shaded places. It quickly produces an abundant and even growth of lovely green grass where ordinary lawn seed mixtures are failures. Lb. 70 cts., 20 Ibs. (bus.) $\$ 11.50$, 100 Ibs. $\$ 55$.

GRASS SEED, continued
TERRACE LAWN SEED. A mixture of fine stoloniferous grasses specially suited to terraces. Will produce a rich and lasting turf. Sow at the rate of two pounds per 100 square feet. This mixture is a combination of such grasses as will make a quick, strong growth, taking a firm hold of the soil and prevent washing away by heavy rains. Lb. 70 cts., 20 Ibs. $\$ 11,100$ Ibs. $\$ 50$.
TENNIS-COURT MIXTURE. Will make a firm, green and lasting turf in the shortest possible time, that will improve with trampling. Lb. 75 cts., 20 lbs. \$12, 100 lbs. \$55.
SEASHORE MIXTURE. This mixture is peculiarly suited to seaside lawns, etc. Lb. 70 cts., 20 lbs. $\$ 11.50$, 100 Ibs. $\$ 55$.
POLO FIELD AND ATHLETIC GROUND MIXTURE. A mixture of specially selected grasses for heavy trampling that will quickly recover from hard usage. 100 Ibs. \$60, 500 Ibs. $\$ 275$.

## Hunt's Lawn Dressing Seed

## A New Product that should not be confused with ordinary lawn dressings, which are merely fertilizers

Our Lawn Dressing Seed is a scientific blending of the Finest Lawn Seeds with those fertilizing elements that give nourishment to the rootlets, thus insuring perfect growth, fine texture, and deep, rich coloring. Germination and rapid growth are stimulated by its free use.

## Unsurpassed for Restoring Old Lawns

"Old age" impairs the looks of many lawns. Bare and worn spots are developed; weeds spring up and choke the grass. Lawn Dressing Seed will restore these lawns. Rake the worn spots thoroughly with an iron-tooth rake; spread the Lawn Dressing Seed heavily on such places and more lightly on the remainder of the lawn. A new growth will soon appear, covering the whole surface with a thick turf.

## Gives New Lawns the Right Start

After preparing the ground spread Lawn Dressing Seed at the rate of 25 Ibs. to each 250 square feet. This gives a foundation for a perfect Iawn. A day or two later sow the whole area with our Prospect Park Lawn Seed at the rate of 1 pound to each 250 square feet. This insures a permanent turf of fine texture which will remain green from spring to fall.

For Golf Courses this product quickly brings the turf to perfection. Our Lawn Dressing Seed is recommended for Fairways and Putting Greens where it is vitally important to have the finest surface.

## Hunt's Perfection Farm Seeds

## Meadow and Pasture Mixtures

Experience has proven that a better and more enduring growth is obtained from a mixture of many kinds of grasses than is possible from the use of only one or two varieties. Different species are suitable for certain conditions-some kinds thrive better on high ground and in dry weather, others on low ground, preferring moist conditions. Some mature early; others Iate.

Our mixtures are compounded with the obiect of securing a good stand from early spring until the setting in of winter.

We are prepared to make special formulas to meet certain specified conditions.

## William M. Hunt \& Company

## Hardy Fruits for the Home Garden

Extra-Strong Selected, Standard Trees

The home fruit garden combines utility and beauty. It is possible, by proper selection of varieties, to supply your table with fruit from the first cherries of early summer to the spicy Northern Spy Apples, which you cut with your friends before the open fire in mid-winter.

The snow-white cherry blossoms, the plum and peach, and later the pear and the delicate pirk of the apple blossoms vie with each other in profusion of bloom. The fruit garden can easily be made a part of the scheme for beautifying your property. There is much satisfaction in watching the growth of these trees that brighten the landscape in spring, and later supply the delicacies to please both eye and palate.

## Apples

Strong selected trees, price of all varieties, each $\$ 1.50$, per doz. $\$ 15$

## EARLY APPLES

Red Astrachan. An old popular variety, tart, juicy; flesh tinged with red.

## AUTUMN APPLES

Fall Pippin. Large, yellow, rich and delicious. A good bearer when it reaches maturity. Likes a moist, well-drained soil.
Gravenstein. Large, yellow, striped with red. Firm and fine flavored. Mediumheavy soil, well-drained.

## WINTER APPLES

Baldwin. Large, deep red; productive and desirable. A winter apple north of New

Apples, McIntosh

## Cherries

Strong selected trees, price of all varieties, each $\$ 2$, per doz. $\$ 22$

## SWEET CHERRIES

Black 'Tartarian. June. Big, dark red or black. Splendid flavor. A favorite.
Yellow Spanish. Late June. Yellow, red cheeks; firm, juicy and delicious. A popular light-colored cherry.

## SOUR CHERRIES

Early Richmond. June. Very productive. Useful for cooking or preserving. Montmorency. Early July. Large, red, tart fruit. Very productive and hardy. A better keeper than Early Richmond.

Peaches, Belle of Georgia

## Peaches

Strong selected trees, price of all varieties, each $\$ 1$, per doz. $\$ 10.50$ MIDSEASON PEACHES
Belle of Georgia. August and September. Large, rich, creamy white flesh, with a bright red blush. Best white peach on the market. One of the best shippers. Pop. ular as a commercial and home garden variety. Freestone.
Elberta. Early September. The popular preserving peach, yellow skin, with deep red cheek. Flesh, golden yellow, firm and juicy Unexcelled for commercial or home use. Has a distinctive flavor. Freestone.
J. H. Hale. Mid-September. Large, yellow, freestone of excellent quality. An improvement over Elberta. Wonderful color, delicious flavor. Freestone.

## Plums

Strong selected trees, price of all varieties, each $\$ 2$, per doz. $\$ 22$
Imperial Gage. Middle of August. A delicious, good-sized freestone, sweet and juicy. Greenish in color.
Shropshire Damson. Last of September. A dark purple, medium-sized variety valued especially for preserving. One of the best sorts for northern planting.

Strong selected trees, price of all varieties, each \$2, per doz. $\mathbf{\$ 2}$

## SUMMER PEARS

Bartlett. Late August. A favorite in all orchards and markets. A large, rich, golden pear; juicy and possessing a delicious flavor, making it most popular as an eating or canning pear.
Clapp's Favorite. August. Large, fine looking; yellow with crimson cheek. Fine grained; an excellent table pear.

## AUTUMN PEARS

Seckel. September and October. The standard of excellence among pears. Fruits medium in size, but rich in quality. Exceptionally sweet and juicy. Particularly valuable for home planting.

## WINTER PEARS

Kieffer. November. Large, golden yellow. Vigorous and productive even when young. Fair in quality and excellent for canning. A good keeper.

## Quince

Orange. September. Large and handsome fruit of good quality. Valued for preserving and jelly making. Each $\$ 2$, per doz. $\$ 22$.

## Small Fruits

## Raspberries

> White Queen, New Everbearing. Introduced by us in 1920, has proved Doz.
> to be all that we claimed. Bears an abundance of almost white fruits
> from August until well into November. The extra-large, firm berries, which are free from seeds and acid, are of exquisite flavor and aroma. Plants attain a height of 6 feet. ## Cultural Hints on Flower Seeds

## The following abbreviations are used throughout the Flower Seed Department:

HA., Hardy Annuals<br>HHA., Half-Hardy Annuals<br>TA., Tender Annuals<br>HP., Hardy Perennials

HHP., Half-Hardy Perennials HB., Hardy Biennials<br>HHB., Half-Hardy Biennials HC., Hardy Climbers

GP., Greenhouse Plants<br>GS., Greenhouse Shrubs<br>GB., Greenhouse Bulbs<br>GC., Greenhouse Climbers

Hardy Annuals, HA. A rich, sandy Ioam, made very fine, is the most suitable soil for the smaller Hardy Annuals. There is nothing better than soil taken from old hotbeds, or sods from an old pasture that have been piled up and allowed to rot for two to three years, and then mixed with a little old stable manure and sand. The soil should be placed in shallow boxes or pots and set in a warm window, hotbed, or, if possible, in a greenhouse. Use shallow boxes or seed pans from 2 to 3 inches deep, and of convenient size.

Sow the seed in April or May, according to your latitude. Do not make the mistake of sowing the seed too deeply-covering only to the depth of the thickness of the seeds is generally sufficient, except in the case of Sweet Peas, which should be planted 2 inches deep, or in the case of medium-sized seeds, Iike BaIsams and Zinnias, which should be planted at least a half inch or more. Fine seeds, such as Portulacas, need only to be pressed into the soil with a piece of board or the palm of the hand. The earth should always be pressed down firmly after sowing flower seeds, or there is danger of their drying up before the roots get firm hold of the soil.

After the seeds are up, plenty of air and moisture should be given them, but water should be judicously applied or they will "damp off." Transplanting to other boxes may be done when the young plants are well out of the seed-leaf. When pots are not available, boxes, and the like may be used.

Half-Hardy Annuals, HHA. Follow same cultural directions as given for Hardy Annuals. Seed may be sown any time after April 15, as the hotbed will be sufficient protection, but it is advisable to cover the glass with a mat or straw until danger of frost is past. Give plenty of ventilation during the day. After May 30 sow in the border, Iike Hardy Annuals.

Tender Annuals, TA. Use very light sandy compost and provide drainage in the pots by placing pieces of broken pots or bits of sod in the bottom. Cover the finer seeds no more than $1 / 8$ inch deep and press the soil firmly over them. In order to have early bloom and strong plants, sow the seed in boxes in March, placing them in a warm greenhouse or plunging in a moderate hotbed, being careful to protect them from the cold, shade them from the midday sun, and water with a fine rose.

Hardy Perennials, HP. Follow the same cultural directions as given for Hardy Annuals, using the same soil, but the Perennials may be sown in the open border from July to September. The seeds of many perennials are slow to germinate, some requiring several months and some as Iong as two years. It is a good idea to cover the plants lightly with straw, leaves, or any dry litter, as soon as the frosts commence, so that they may be protected from the extremely severe winter weather.

Half-Hardy Perennials, HHP. Use same soil and cultural directions as for Hardy Annuals. Nearly all kinds of Half-Hardy Perennials may be sown in the open borde i in a warm and sunny spot as soon as the soil has become dry and warm, so that those who do not have coldframes or greenhouses need not be deprived of this class of flowers, though they may have to wait a Iittle later for their blooms.

Hardy Biennials, HB. These require the same soil and treatment as the Hardy Perennials, which see.

Half-Hardy Biennials, HHB. Use same cultural directions as given for HalfHardy Perennials.

Hardy Climbers, HC. Follow same cultural directions as given for Hardy Annuals or Hardy Perennials, depending on which class they belong to.

## ANTIRRHINUM, Hunt's GENEVA PINK

## A Wonderful New Snapdragon

Lovely in color. Profuse in bloom. Strong in growth. Unrivaled by any other new or old Antirrhinum

AMOST superb Snapdragon, the best we have ever had the privilege of seeing. The individual flowers are Iarge, a delightful glistening rose-pink, borne in Iong, dense spikes, and supported on long, stiff stems, well furnished with rather dark green foliage. The plants are robust growers, and bloom with remarkable freedom. Geneva Pink grows and blooms equally well outdoors or under glass.

Those who have seen Hunt's Geneva Pink are enthusiastic over it; we already have many orders for seeds just by its worth being spread by gardeners who have seen it.

For many years Mr. Axel Johnson, Lake Geneva, Wisconsin, has been growing Snapdragons, selecting seed from the best. Several well defined but not fixed strains resulted. About three years ago a beautiful rose-pink strain that Mr. Johnson particularly prized came true; this was named Geneva Pink. The seed is grown for us under glass to avoid any chance of mixture-it will come true. This year we have sufficient to enable us to offer a limited amount to our customers. We suggest early orders to avoid disappointment.
$\$ 2$ per packet, $\$ 5$ for 3 packets

Geneva Pink Snapdragons

Sensation. Bright orangescarlet with white throat. Pkt. 25 cts.
Mixed. Pkt. 10 cts., 1/4oz. 50 cts.

## Hunt's Perfection Flower Seeds

## Hunt's Perfection Asters

For early flowering, the seed should be started in the house, hotbed, or coldframe, in March, transferring the seedlings to their permanent flowering position as soon as all danger from frost is past. Asters prefer a sunny position and thrive best in a heavy loamy soil enriched with bonemeal or Clay's Fertilizer. See page 112.

## LATE BRANCHING

Recommended for late flowering; vigorous; profuse bloomers. The large and graceful flowers are borne on erect strong stems. One of the most popular types grown. Height 2 ft . Carlson's Lavender. . . . . . $\$ 0$|  | 15 | $\$ 0$ | 75 | Vick's Purple..........$~$ | $\$ 0$ | 15 | $\$ 0$ | 60 |

## Cineraria HHP

One of the best and most attractive flowers for the greenhouse. The strains we offer are grown for us by one of the leading English growers.
Cactus-flowered Mixed. Large flowers with narrow rolled petals radiating Pkt. from a smaII center.
.3 pkts. $\$ 2.50$. . $\$ 100$
Hunt's Perfection Mixed. A strain of giant flowers of the finest form and substance; includes the brightest and richest self colors as well as the most fantastic shades

3 pkts. \$2.75.
Hunt's Perfection Dwarf Mixed. Dwarf and compact habit, carrying Iarge flowers in an endless variety of colors
Hybrida Multiflora Nana. A new race of Cineraria, producing dwarf plants with masses of small flowers, measuring about $3 / 4$ inch in diameter, in compact heads, over small and dainty foliage. The flowers are all self-colored, embracing shades of light and dark pink, light and dark blue, red and violet. An extremely useful plant for decoration 3 pkts. $\$ 2.50$.100

Stellata, Choicest Mixed. Unexcelled for house and conservatory decoration during winter. The star-shaped flowers are held on very long stems, making it very useful and attractive as a cut flower. . . . . . . . . . . . . . . . . . 3 pkts. $\$ 2.75$.
Maritima (Dusty Miller). Very useful for bedding or edging. $11 / 2 \mathrm{ft}$. $1 / 8 \mathrm{oz} .75 \mathrm{cts}$

## Cosmos HA

Special attention is requested to the list of early blooming varieties which begin to flower almost immediately after planting and continue until cut down by frost. Unexcelled for table decoration.

Pkt. 1/4oz.
Early-flowering Crimson. $\begin{array}{llll}\$ 0 & 15 & \$ 0 & 50\end{array}$
Early-flowering Pink 50
Early-flowering White............................................................ 15
Double Pink. The flowers, while not Iarge, are very double and daintily set in the foliage, making it invaluable for the table.. il $^{\frac{1}{16} \text { oz. } \$ 1.50 . .} 25$
Double White. A white variety of the foregoing with all its merits.. 25
New. Double Early-flowering Hybrids. The flowers of these new hybrids measure 3 to 4 inches across. About 60 to 70 per cent of the seedlings produce smaII petals instead of stamens, thus forming handsome double blooms. They supply a fine range of colors; all shades from white to pink, rose, carmine, and blood-red, being represented. These new double Cosmos are of the true early-flowering type, blooming from June to October........................................... 5 pkts. \$1.25

Mrs. Buckston. Immense salmon flowers, with beautifully frilled petals

## Dahlias

Dahlias may be had in flower the first season from seed which should be sown February or March. Pkt.
Large Double Show . . . . . . . . . $\$ 015$
Cactus............ . . . . . . . . . . . . . . 15
Single Giants.................. . . 15
Mignon Mixed. Very valuable for bedding, borders, and shrubberies. The plants are of a compact, close habit and produce a dense mass of flowers of the most brilliant colors. Blooms continuously from early summer until cut down by the heavy frost

## Delphinium HP

The Delphinium, or Hardy Larkspur, is probably the most valuable of all herbaceous plants, and provides many of the light and dark shades of blue, colors always desirable, but far too scarce in flowers. Many delightful shades of lavender and mauve are also present in the newest strains, all of which will be found in our Perfection Hybrids, which we recommend to those who desire the right start for "Glorious Delphiniums."
Belladonna, Improved. Slender stems of 5 feet in length bearing num- Pkt. 1/8oz. erous flowers of a lovely azure-blue shade. It is exceIlent for cut-flowers and comes true from seed. 5 pkts. \$1. . \$0 25

## Sweet Peas

## Introductory Remarks Specially Compiled for the Amateur

During recent years the Sweet Pea has evoIved into a different flower. The newer form, being offered as "Spencer" or "Orchid," has the advantage of being above aII much larger, fully twice the size of the older form, being borne on stout stems 12 to 15 inches long, each stem producing invariably four and often five flowers. The form has been changed to a far more graceful and beautiful flower. Each petal is elegantly waved and frilled, resembling the rarer orchids to a certain extent.

## The Twentieth Century Method of Growing Sweet Peas

For Early Blooms. Sow three seeds into a small pot of soil in the house about March 1. If all three seeds germinate, pull out the two weakest specimens and retain the strongest. As soon as the second set of leaves has formed, plunge the young plants with the pots in a coldframe protected by sash, where they can be hardened off. Lift the sash during the sunny hours of the day and water carefully. Set the plants out in the open about April 15, and space them 6 inches apart in the row.

## General Culture

Four ounces of seed will be sufficient to plant a single row of ioo feet
The ground where Sweet Peas are to be grown should be well prepared-if possible, the fall previous. Deep spading or plowing is very essential for the roots love to penetrate into the cooler regions of the soil. Manure placed very deep will help to draw the roots downward. Sweet Peas Iove sun, therefore they should always be planted where they are exposed to the sun all day.

Sow Seeds Early. Sweet Peas will produce their strongest roots during the cool moist months of the spring, so that the sowing should take place as soon as the Iand can be worked. A little frost will do no harm to Sweet Peas. After the soil has been carefully smoothed and raked, draw a line for a straight row and sow three seeds every 6 inches in the row. Do not cover the seed more than with $1 / 2$ inch of soil, and if more than one plant should appear in each spot, carefully destroy all but one specimen so that one plant shows every 6 inches in the row.

## Spencer Sweet Peas The Revised Up-to-date Selection

It would be impossible to list all the varieties of Sweet Peas, so we give what we consider to be the cream of the best varieties, both of the standard kinds, and those of recent introduction.

We recommend these for general outdoor growing throughout the United States, except in the extreme South, where Sweet Peas flower during the winter and where the Early-flowering type gives best results. Many Sweet Pea lovers plant a short row of the Early-flowering kinds to get the advantage of early blooms, but we recommend the Summer-flowering Sweet Peas for your principal crop for outdoor planting either during the spring or fall.

To simplify ordering we are listing the different varieties in their color classification

## Hunt's Perfection Bulbs and Roots

## Dahlias

Culture.-Dahlias prefer an open, sunny situation, light and rather poor soil, and at least 3 feet of space between the plants. No manure or fertilizer should be embodied with the soil at or previous to time of planting. Tubers should not be planted before April 15. Immediately on receipt of the plants they should be set out and carefully watered, and for the first day or two they should be shaded from the bright sun. Cultivation around them every day gives better results than all the artificial watering in the world. Each plant should have a support, to which the main stem is carefully tied. While we do not recommend adding manure or fertilizer to the soil, we strongly urge feeding Dahlia plants from the surface by spreading manure or fertilizers on the surface after the plants have attained a height of 15 inches or more, and either moisten it or fork it lightly into the soil.

To make Dahlia blooms Iast after cutting, follow this suggestion: Cut flowers Iate in the evening, and plunge the freshly cut stems into hot water for a few minutes, afterward into cool water, and put them away in a cool cellar for the night. In the morning bring them to the room where they are wanted, and flowers then will easily last for three to four days.

Dahlia tubers can be delivered from April onward. Young plants can be delivered during May, June, and July. Please state, when ordering, the exact date on which they are wanted.

## The Up-to-Date Exhibition Collection

The varieties submitted below are the cream of the latest prize-winning Dahlias. Tubers will be ready for delivery April 1. Started plants from May 1 to June 15.

## Revised List of New and Popular Varieties

## PEONY-FLOWERED DAHLIAS

This class of Dahlias has quickly come to the foreground within the Iast ten years. They were formerly looked down upon on account of being only semi-double, but their decidedly artistic effect, combined with some wonderful colors and immense size of blooms, has now given them a place ahead of almost all other classes. The inner petals are usually curved or twisted, sometimes covering all of the center. The outer petals are either flat or more or less irregular.
Autumn Beauty. The Iarge flowers are a lovely combination of autumn shadesa pleasing shade of yellow and buff with a suffusion of light rose-the petals being much curled and twisted. 75 cts. each, 3 for $\$ 1.90$, 6 for $\$ 3.65$.

## PEONY-FLOWERED DAHLIAS, continued

Geisha. Orange-red with yellow center. This is a well-known Iarge, bold variety of unusual beauty. 75 cts. each, 3 for $\$ 2,6$ for $\$ 3.75$.
The Bride. Beautifully shaped white flowers with a suffusion of blush toward the center. 50 cts. each, 3 for $\$ 1.30$, 6 for $\$ 2.45$.
Yellowstone. One of the very best Peony-flowered varieties, of a pure canary-yellow color. \$3 each.

## CACTUS AND HYBRID CACTUS DAHLIAS

In the Cactus Dahlias the flowers are fully double, with the floral rays long, narrow, incurved or twisted. The points are either sharp, divided or fluted and the margins rolled back, forming a more or less perfect tube for more than half the length of the ray. This type is very valuable, since the blooms last exceptionally long as cut-flowers. Some of our very finest Dahlias in existence belong to this type.

The Hybrid Cactus Dahlias are fully double, with decidedly shorter petals as compared with the true Cactus Dahlias. The petals are broad, flat, incurved, or twisted. They are not sharply pointed except where the tips are divided, and the margins are only slightly rolled back. If the flowers form any tubes, they are less than half the Iength of the ray. These Hybrid Cactus Dahlias are a valuable class for garden decoration as well as for cutting.
Contrast. HC. Rich crimson-scarlet, tipped with pure white. It sometimes sports to a solid crimson-scarlet or pure white. The contrast is most fascinating. $\$ 1$ each, 3 for $\$ 2.70$.
E. F. Hawes. A lovely shade of clear salmon-pink. The blooms are produced most freely on fine long stems. 35 cts. each, 3 for 90 cts., 6 for $\$ 1.70$.
F. W. Fellowes. This is a remarkable variety, having flowers of magnificent size, with petals very numerous, long, and incurved. Their color is a burning orangescarlet. Forms a magnificent plant, full of flowers. 75 cts . each, 3 for $\$ 1.90$.
Homer. Large, beautifully incurved flowers are borne on strong, upright plants. The blooms are well formed and of bright rich maroon color. 50 cts. each, 3 for $\$ 1.30$, 6 for $\$ 2.45$.
John Riding. Many consider this one of the best in its class. The color is a rich crimson. 50 cts. each, 3 for $\$ 1.30$, 6 for $\$ 2.45$.
Kalif. HC. The color is a rich pure scarlet. The plants are of strong growth and bear their mammoth flowers freely on fine long stems. 75 cts. each, 3 for $\$ 1.90$, 6 for $\$ 3.65$.
Mrs. A. C. James. Rich saImon-buff, with a suffusion of yellow. The flowers are of good size, best form, and superior habit, with the petals slightly incurving. $\$ 1$ each, 3 for $\$ 2.70,6$ for $\$ 5$.
Red Cross. HC. A strong grower that blooms freely and carries its flowers on long strong stems. A combination of bright red and yellow. $\$ 1.50$ each, 3 for $\$ 4,6$ for $\$ 7.50$.
Starlight. Rich deep yellow flowers which lighten up to a dainty lemon tint and finally to white at the tips. A fine exhibition Cactus Dahlia. 75 cts. each, 3 for $\$ 1.90$, 6 for $\$ 3.65$.
Vulcan. A beautiful blackish crimson, of good size. The flowers are borne freely and are carried on stems of great length. \$2 each.

## DECORATIVE DAHLIAS

The flowers are full to the center early in the season. They are thick but not ballshaped, with broad, flat, somewhat loosely arranged petals. The points are broad or rounded; the tips may be straight or turned down and in some varieties the margins are slightly rolled back. Within recent years this type of Dahlia has been enriched with quite a number of outstanding novelties. Whether used for garden display or for cut-flowers, they always give the greatest satisfaction.
Hortulanus Fiet. Has immense flowers of wonderful form and beautiful autumn coloring-rich salmon, suffused with amber and yellow. 75 cts. each, 3 for $\$ 1.90$, 6 for $\$ 3.65$.

Cactus Dahlia, Starlight
Strong tubers, 3 for $\$ 1.90$, postpaid

## William M. Hunt \& Company

## DECORATIVE DAHLIAS, continued

Jean Kerr. The most valuable of aII white Decorative Dahlias. In type it is a shortpetaled Decorative. The blooms are pure white, gracefully carried on Iong, strong stems, well above the foliage. 75 cts. each, 3 for $\$ 1.90,6$ for $\$ 3.65$.
King of the Autumn. This is one of the most admired varieties. An early and very free bloomer, on fine stems. The immense blooms are of fine form, and an excellent autumn shade--buff-yellow suffused terra-cotta. $\$ 1$ each, 3 for $\$ 2.70$, 6 for $\$ 5$.
Mina Burgle. This is the best red Dahlia in existence. The plants are of strong, sturdy growth, bearing the immense flowers upright above the foliage, on Iong strong stems. 50 cts. each, 3 for $\$ 1.30$.
Patrick O'Mara. A GoId Medal variety, and one of the very best. Color a beautiful orange-buff with rose-pink shading. The habit of the plants is excellent and the size is simply immense. $\$ 1$ each.
Princess Pat. A most beautiful shade of old-rose. The flowers are of great size; stems exceIlent. $\$ 1$ each, 3 for $\$ 2.70$.
Rosa Nell. Has been called "the Dahlia without a fault." Color a clear bright rose; should be in every collection. $\$ 2.50$ each.
Stunner. A very large flower of a rich, clear canary-yellow color. Excellent form and sturdy habit. $\$ 1$ each, 3 for $\$ 2.70,6$ for $\$ 5$.
The Emperor. A truly immense flower of exquisite form, held well above the healthy foliage. The color is a most beautiful rich maroon. $\$ 7.50$ each.
The Grizzly. The flowers are extra large, rich dark velvety maroon; unsurpassed in this shade. $\$ 1.50$ each, 3 for $\$ 4$.

## POMPON DAHLIAS

This is an old type which was much in favor in the gardens of our forefathers and recently it has justly come again to the foreground. The flowers are small and very regular in form. They are practically ball-shaped, with short petals which are rolled to form small funneIs. They usualIy are of dwarf or medium growth and are exceIlent for borders and fine for bouquets.
Adrienne. Flowers are of perfect form, rich crimson-scarlet, slightly tipped with yellow. Free blooming and strong growing. 25 cts . each, 3 for 70 cts., 6 for $\$ 1.30$.
Bacchus. This is a very fine Pompon Dahlia of bright crimson-scarlet color. The flowers are small, very compact, and of neat shape. 25 cts . each, 3 for 70 cts ., 6 for $\$ 1.30$.
Daisy. The handsome little flowers are of perfectly rounded form and are borne with the greatest freedom. The color is a combination of amber and salmon, very delicate and appealing shade. 75 cts. each, 3 for $\$ 1.90$, 6 for $\$ 3.65$.
Dr. Jim. A perfect little flower borne profusely on good long stems. The groundcolor is light, heavily edged with bright purple-very artistic. $\$ 1$ each, 3 for $\$ 2.70$, 6 for $\$ 5$.
Nerissa. A charming little flower that should be included in every collection. It is soft pink tinted with silver. 75 cts . each, 3 for $\$ 1.90,6$ for $\$ 3.65$.
Queen of Whites. This is considered one of the best white Pompon Dahlias in existence. It bears flowers with the greatest freedom. 25 cts. each, 3 for 70 cts., 6 for $\$ 1.30$.

## COLLARETTE DAHLIAS

Frogmore. Flowers are orange-scarlet tipped with yellow, collar petals rich canaryyellow, forming a most effective and artistic color contrast. 35 cts. each, 3 for 90 cts., 6 for $\$ 1.70$.
Maurice Revoire. The contrast between the deep crimson petals and the graceful white collar is very striking and artistic. 35 cts. each, 3 for 90 cts., 6 for $\$ 1.70$.
Queen Anne. The ray petals are glowing scarlet tipped with yellow and the collar rich yellow. 25 cts. each, 3 for 70 cts., 6 for $\$ 1.30$.
With the exception of the Up-to-Date Selection, all the prices are for extra-strong planting divisions (tubers)

## Hunt's Perfection Bulbs and Roots

## Gladioli

## Valuable Cultural Hints for the Amateur

Our selection has been painstakingly studied, with the sole object of offering the most beautiful sorts in the world, and from these only such as have distinctive merits.

Culture. Gladioli will succeed in all kinds of soil, provided the location is a sunny one. Before spading or plowing, manure the ground thoroughly, as the Gladiolus likes a rich ground.

Time of Planting. Just as soon as the frost is out of the ground, and the beds are properly prepared, the bulbs can be planted. In the vicinity of New York this may take place early in April. If the flowers are wanted in successive crops, it is best to make weekly plantings, and, if planted as Iate as June 30 th, the flowers will appear before frost time. Many of the more delicately colored Gladioli will produce better and clearer colored blooms late than if they appear during the hot summer months.

Staking. As soon as the sword-like foliage has developed to a certain height each plant should be supported with a light stake, provided the Gladioli are wanted for garden effect. The best looking support is the thin Japanese bamboo dyed a grassgreen; it is straight, wiry, inconspicuous and extremely inexpensive.

Feeding. Gladioli are gross feeders, and we find pulverized sheep manure is the most result-producing food. Apply it between the rows after the foliage has made a good start, and repeat the application every two weeks until the buds show. From that time on liquid sheep manure, applied every other day, produces splendid results.

Watering. Continued moisture is just as essential for the successful growing of these flowers as food, and we wish to impress our readers with the fact that drought is most detrimental to their health.

Cultivation. It is a well-established fact that every plant benefits by constant cultivation, and if we were asked what part of the culture is the most important we should always say cultivation. The soil around the plants should always be open.

Depth and Distance to Plant. Our recommendation is to plant 4 inches deep and 4 inches apart.

## GLADIOLUS PRIMULINUS, or RUFFLED TYPES

This species of Gladiolus created a sensation wherever it was exhibited. The blooms are distinct in their pleasing form and arrangement. Although the individual flowers are not large, they carry an air of grace altogether different from the stiff effect of other Gladioli.

Extra-large bulbs $11 / 2 \mathrm{in}$. and upwards in diameter

## Hardy Garden Lilies

Hardy Lilies are among the most gorgeous and easily grown subjects for the herbaceous border, and, without crowding other plants, throw up their sturdy stems each year with an eager desire to unfold their wonderful blooms over the heads of nearby companions, and hold the admiring gaze of those who pass by. Lilies thrive in partial shade, that is, the lower stem and bulb are better shaded by the foliage of other plants. Their stem roots, which feed almost on the surface of the soil, need plenty of food and moisture. They revel in the "peaty" soil of a rhododendron bed, but thrive equally weII in a rich sandy loam. The most beautiful forms are Lilium auratum, $L$. speciosum, vars. melpomene and rubrum,L. regale,L.tigrinum, and L. Henryi. Plant from 4 to 6 inches deep. Auratum (The GoIden-banded Lily of Japan). One of the stateliest of aII the hardy

Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers
eight to 10 inches in diameter. Planted in clumps of six or so, they make an at-
tractive sight. Flowers white, spotted deep red, with bright yellow band running
through the center of each petal.

## HARDY GARDEN LILIES, continued

Batemaniæ. Beautiful Japanese variety, growing 3 feet high, with six to eight apricot-colored flowers on a stem. Blooms in July and August
Brownii. One of the finest Lilies in cultivation. The immense trumpet is 10 inches in length; inside pure white with brown anthers; exterior deep brownish purple; of great substance. A vigorous grower. Bulbs very scarce.
$150 \quad 1200$
Canadense. Canadian Bellflower Lily. One of the best of our native Lilies. Flowers vary in color-red and yellow. Grows 2 to 5 feet high; very suitable to plant among shrubbery and thrives well in the shade. Flowers in June and July. Very hardy
$20 \quad 200 \quad 1600$
Croceum. Golden yellow. Very reliable and hardy Lily. Height 3 to 4 feet. Flowers June and July
$50 \quad 400 \quad 3000$
Davuricum. Large, bright scarlet flowers; of easy culture; if given good treatment attains the height of 3 to 4 feet. Flowers in August.
$20 \quad 200 \quad 1600$
Davuricum. Pure yellow.
$20 \quad 200 \quad 1600$

Elegans. Mixed colors. Vigorous and easy grower. Flowers in June. Height 3 feet
$20 \quad 200 \quad 1600$
Hansonii (maculatum). Rare Japanese Lily that produces clusters of six to ten reddish flowers. Under favorable conditions attains the height of 3 feet. Early and beautiful. Once established this variety blooms profusely year after year....
Henryi. Yellow Speciosum. In form and habit resembles the Lilium speciosum. Flowers shaded yellow, slightly varying in color, with a distinct and waxy green center. Grows 4 to 5 feet high, and comes into bloom during August and September.
Myriophyllum. Regale Lily. Of comparatively recent introduction, this variety has come to be regarded as one of the best Lilies for the garden. White flowers, trumpet-shaped, slightly suffused pink, with yellow center; very fragrant. At its best about the end of June. Height 3 to 4 feet. Will thrive in any good soil if not too wet
$\begin{array}{llll}100 & 10 & 00 & 75\end{array}$
Pardalinum. Leopard Lily. A robust and free-flowering variety. Does weII in all situations and produces superb flowers of rich scarlet and yellow, spotted with brown. Height 4 feet. Flowers in July.
Sargentiæ. This variety was introduced about the same time as L. myriophyllum. A distinct Lily, being vigorous, hardy and free-flowering. The trumpet-shaped flowers are milkwhite with yellow throat, and the outside petals are deep red and brown. Very fragrant. Exceptionally fine as a pot plant. Flowers in July. Bulbs very scarce.
Speciosum album. This is a very dainty white Lily. It flowers in the border or amongst the shrubbery at the same time as L. auratum, and is one of the most popular varieties. Used extensively in pots for greenhouses. Height 3 to 4 feet. Mammoth bulbs, 11 to 13 in . circum

Pfitzeri. Red-Hot Poker. Very fine for bedding. Brilliant red; blooms throughout the late summer and fall. $\$ 3$ per doz., $\$ 20$ per 100 .

## Tuberoses

The sweet-scented Tuberose is now exceedingly popular. It possesses a character and perfume distinct from any other flower. Easy of cultivation both indoors and out. Excelsior Pearl. Large; double; white. $\$ 1.75$ per doz., $\$ 8.75$ per 100 .

## Spireas

## Retarded roots from cold storage

We have placed in cold storage a large supply of the following varieties, using only the Iargest and finest clumps. They are excellent for forcing from May until Christmas. When ordering, please specify date of delivery required.

Packed and sold only in cases of 12 clumps
America. Lilac-rose
Gladstone. Well-known and the best white variety. Earlier than the pink Spireas
Princess Mary. Deep rosy pink. Vigorous grower and a very beautiful variety. 1400
Queen Alexandra. The best-known pink. The combination of foliage and trusses make a very symmetrical plant

Border of Hunt's Perfection Peonies

An old Scotch gardener, when asked how he grew such fine Roses, told his inquisitor to "buy a cow." Though the advice was concise, there was a world of truth in it. Rotten cow-manure, dug unsparingly and deeply into the ground, is the foundation of a perfect growing compost, provided good drainage has been placed underneath. In the spring, apply bonemeal, lightly raked under the surface, then water thoroughly every day, apply Iiquid cow-manure every 10 days, and you will have the kind of Roses that makes them worth the growing-gigantic flowers on long, sturdy stems.

Of course, cow-manure is not always readily procured, and substitutes must be made of stable manure, sheep-manure, and commercial garden fertilizers, but one must accordingly expect a less vigorous plant and smaller flowers. Sods chopped up and dug into the bed will, in a way, replace the heavy manure by giving the soil a heavy, spongy texture.

Bush Roses require at least 3 feet distance apart. Plant without cramping roots and see that soil is firmly packed around and between the roots. When planted, the "bud" or "graft" should be about 1 inch below the surface. Next to the richness of the earth, pruning is the most important phase in growing good Roses. Early in the spring all shoots must be cut back, the leaders or previous year's growths, to 4 to 6 eyes, and the laterals or side shoots to 1 or 2 eyes-aII old wood should be taken out entirely.

The vigor and type of Rose determine the severity of the pruning; those of sturdy growth should not be cut back as far as those of dwarfer habit. Watch for aphis and green fly from June onward, and check with a nicotine spray, such as Black-Leaf 40. June also brings the Rose-bug, for which Melrosine is said to be beneficial in exterminating.

Protect your bushes in winter by either drawing the earth up in a mound around the lower half of the bush, leveling again in spring; or place a thick litter of Ieaves or straw over the entire bed.

# Hybrid Tea, or Everblooming Roses 

## Extra-strong field-grown plants, $\$ 1$ each, $\$ 11$ per doz. April delivery

Betty. Extra-Iarge flowers, fuII and fragrant. A peculiar shade of coppery rose, overspread with golden yellow. Vigorous-grown plant.
Chateau de Clos Vougeot. An indispensable Rose in any garden by reason of its deep, soft, velvety scarlet flowers of the utmost richness and most notable fragrance.
Columbia. A different and splendid American Rose, the lively pink buds and blooms of which do not fade as they mature. Nearly thornless stems, freely produced on strong plants.
Duchess of Wellington. Vigorous and free-flowering Rose. Its buds are slim and elegant, saffron-yellow, and opening to a loose and informal flower of great sweetness and beauty.
Francis Scott Key. Its pleasing crimson buds quickly open into a very double flower of immense size and great beauty, lasting in perfection for days.
General MacArthur. Large, full, and well-shaped flowers of veIvety scarlet, shading to bright crimson, and produced abundantly on strong-growing plants.
George C. Waud. Fine and fragrant globular flowers of bright and different redcrimson, on a vigorous plant that persists in blooming all summer. Unique in its color and habit.
Gruss an Teplitz. The one Rose that blooms aII summer and autumn, defying drought and hot sun. Its glowing crimson flowers are in clusters on plants that may be grown into a wonderful hedge. Fine for planting in shrubbery border.
Harry Kirk. Probably the most dependable in its color, which is the much-desired clear yellow. The flowers are sweetly perfumed; plant remarkably vigorous and of free-flowering habit.
H. V. Machin. Very large flowers of the much-admired scarlet-crimson color, on sturdy and productive plants; one of the best of its type. Clear and bright red Roses are always pleasing.
Jonkheer J. L. Mock. Cherry-red and silvery pink in an immense bud and flower that Iooks like an intensified La France. Unique; good fall bloomer, and the plants are vigorous.
Killarney Queen. Remarkable for its very Iong and lovely deep pink buds, freely produced on a vigorous plant, and opening into broad blooms of informal beauty. Much better than the original Killarney.
Lady Alice Stanley. Deep coral-rose on the outside of the broad petals, pale flesh on the inside, with well-shaped buds which develop into fragrant blooms, profusely borne on very vigorous plants.
Lady Ashtown. Pale carmine-pink, shading to golden yellow at the base of the petals. Large, well-formed flowers; a profuse bloomer all season until frost.
Mme. Edouard Herriot. Also called "The Daily Mail Rose." Its coral-red buds develop into flowers of the same hue, shaded yellow to scarlet, an extraordinary coloring.
Mme. Jules Bouche. A most dependable white Rose, its Iovely buds being tinted and flushed pink at times. Plant has aII good qualities and blooms welI.
Mme. Leon Pain. Unusually Iarge and full flowers, with ovoid buds of salmon, shaded to orange-salmon in a distinct and delightful combination. Plant vigorous and a good fall bloomer.
Mrs. Aaron Ward. A Rose of pleasing surprises because of its color variations, all based on its normal, deep Indian-yellow hue. Buds Iovely, coming in profusion on the strong plants.
Mrs. Ambrose Ricardo. Large blooms of fine substance, deep yellow overlaid with a lighter color and suffused in pink; fragrant, free, and vigorous.
Mrs. Wakefield Christie Miller. Great peony-like, open flowers of delightfuI clear rose and blush tints. It is top-notch in its color.
Miss Cynthia Forde. On a tall and vigorous plant come many brilliant, rose-pink buds, opening into large flowers that show peculiar pointed and edged petals; fragrant and fine, and at the head of its class.

## Hunt's Perfection Roses

## HYBRID TEA, or EVERBLOOMING ROSES, continued

Ophelia. A standard with which to compare other Roses is this salmon-flesh-pink flower with its buds of peculiar elegance. Formerly only known as a greenhouse Rose, but found to do well in the garden.
Premier. Rich, dark pink flowers of full size, fine form, and pleasing fragrance, borne singly on stiff, thornless stems rising from a vigorous and robust plant.
Radiance. Lovely, light silvery pink flowers, with beautiful suffusions of deeper color. The plant is upright, vigorous, and disease-resistant, and may be relied upon to produce abundant flowers under all conditions.
Red Radiance. Even better than the parent Radiance in habit, and a lovely deep red color in its great, globular flowers.
Los Angeles. Awarded world's highest Rose honor at Paris in 1918. Color indescrib-able-flame-pink, apricot, salmon, gold, mingled in an informal flower of notable fragrance; buds exquisite.
Mme. Butterfly. Flowers are a brilliant pink, suffused apricot and gold, of good texture and fragrance, and are unusually enduring.
Mme. Caroline Testout. Broad petals of satiny rose make up the large, rounded flower, shaded darker at the center and lighter at the edges: vigorous bushes.

Collection-12 Roses in 12 varieties, our selection, $\$ 11$

## Hybrid Perpetual, or June Roses

These old-time Roses will give an abundance of bloom in June and grow much taller than the Everblooming Roses; for this reason they are mostly used for individual bushes, among shrubbery, or along fences. The hardiest of aII Roses.

Extra-strong, field-grown plants, $\$ 1$ each, $\$ 9$ per doz. April delivery
Captain Christy. Plump and heavy buds with backward-curling petals, including both light and dark pink colors.
Frau Karl Druschki. The most popular Rose in America. Its pure, snow-white, unshaded blooms are of immense size, sometimes reaching 6 inches in diameter.
George Arends. WeII-shaped, delicate pink buds of pure, even color, opening into Iarge and very beautiful flowers.
Magna Charta. Large flowers of rosy carmine, carrying heavy fragrance, and freely produced on vigorous plants.
Mrs. John Laing. Immense blooms of soft, clear pink; fragrant. Deservedly popular.
Ulrich Brunner. Large flowers of light, clear red, tending toward scarlet and showing a shade peculiarly its own.
Collection-5 Hybrid Perpetual Roses in 5 varieties, our selection, \$5, postpaid

## Everblooming Hybrid Teas. Pot-Plants

Strong, 2-year plants, from pots, ready for delivery in May and later, 90 cts. each, $\$ 10$ per doz., except where noted

## WHITE

Double White Killarney. Strong in growth; free flowering and very fragrant.
Kaiserin Augusta Victoria. Soft, pearly white, shading to creamy yellow, very double and sweetly fragrant.
Panama. Very delicate flesh, shading lighter toward the petal margins.

## PINK AND BLENDED

Columbia. Lovely shade of peach-pink, deeper at the center. Very strong in growth; free and fragrant.
Killarney Brilliant. Color varying from bright pink to deep rosy carmine. Very free blooming and excellent for cutting.

## William M. Hunt \& Company

Richmond Roses

## EVERBLOOMING HYBRID TEA ROSES, continued

Killarney Queen. Color sparkling cerise-pink, shading to lighter pink at base of petals; well-formed flowers; handsome when in full bloom.
Lady Alice Stanley. Deep coral-rose on outside, inside petals pale flesh. One of the best garden Roses.
Los Angeles. Flamed pink, toned with coral and shaded translucent gold at base of petals; exceedingly fragrant; very vigorous in growth. $\$ 1.50$ each, $\$ 15$ per doz.
Mme. Abel Chatenay. Carmine-rose, shaded salmon. Very hardy and satisfactory for cutting or garden decoration.
Ophelia. Salmon-pink, shaded with rose; large, well-formed flowers, carried on long, stiff stems. One of the most popular Roses introduced in recent years.
Premier. Brilliant pink in color; very free; produces large flowers on erect, strong stems. $\$ 2$ each, $\$ 20$ per doz.
Radiance. Flowers Iarge and perfect in form. Carmine-salmon shade, mingled with rose, shading to a coppery yellow at base of petals. 4-inch, grafted plants, $\$ 1$ each, $\$ 10$ per doz.

## YELLOW, ORANGE, AND SALMON

Duchess of Wellington. Color intense saffron-yellow, becoming deep copper-yellow as flower expands. The flowers are of Iarge size and splendid in form.
Golden Ophelia. Bright yellow, shading to pale yellow at edge of petals. Very fragrant and vigorous in growth. A new variety of great merit. $\$ 1.50$ each, $\$ 15$ per doz.
Lady Pirrie. Outside of petals coppery, reddish salmon apricot-yellow flushed fawn and copper on the inside.
Mrs. Aaron Ward. Deep Indian yellow, shading to primrose-yellow toward the edges of the petals. Very dainty, perfectly shaped buds and blooms.
Old Gold. Color reddish orange, with coppery red and apricot shadings.
Titania. Coppery crimson in bud form, opening to deep salmon-red with clear yellow shadings at the base of petals.

## CRIMSON

Gruss an Teplitz. Bright scarlet-crimson, with fiery red center; quite hardy and extremely free-flowering.
Richmond. Scarlet-crimson in color; very fragrant and free-flowering.

## Hunt's Perfection Roses

## Tea Roses

This class of Roses requires a good location somewhat sheltered.
Strong, 2-year plants, from pots, 90 cts. each, $\$ 10$ per doz.
Harry Kirk. Deep sulphur-yellow, passing to lighter shade at margin of petals. Robust grower.
Lady Hillingdon. Deep golden yellow. The finest of all yellow Roses.
Maman Cochet. Beautiful rose-pink, outer petals splashed bright rose.
Molly Sharman-Crawford. Large, perfectly formed white flowers of excellent keeping qualities.
White Maman Cochet. A pure white sport of Maman Cochet, and similar to its parent excepting in color.

## Hybrid Perpetual Roses

Strong, 2-year plants, from pots, 90 cts. each, $\$ 10$ per doz.
Alfred Colomb. Bright cherry-red, shaded with crimson; of fine, globular form and very sweet.
Captain Hayward. Bright carmine-crimson; Iarge-petaled flowers opening well; fragrant and free.
Frau Karl Druschki. Pure white in color, perfect in form, and very free-flowering;
General Jacqueminot. This magnificent variety is known as the "Jack Rose." Flaming scarlet.
George Dickson. VeIvety black, shaded crimson, veined crimson-maroon; fragrant and of splendid substance and form.
Hugh Dickson. Brilliant crimson, shaded scarlet; a magnificent Rose; free and fragrant.
Margaret Dickson. White with pale flesh center; splendid form and substance. Growth very vigorous. Should be pruned lightly.
Mme. Gabriel Luizet. Large, full flowers, cup-shaped in form. Pale clear pink in color; very fragrant.
Mrs. John Laing. Color, beautiful soft pink, flowers very Iarge, perfect in form, and exceedingly fragrant.
Ulrich Brunner. Cherry-red; flowers large, fuII, and of globular form.

*VIOLA cornuta, G. Wermig. Large blue flowers, produced in great numbers during the entire summer ..... 300
VIOLET, Prince of Wales. Rich violet flowers ..... 300

## Hunt's Perfection Plants

## Hardy Chrysanthemums

Prices, strong $21 / 2$ and 3 -inch pot-plants of all varieties listed below, $\$ 2.50$ per doz., $\$ 18$ per 100. Field roots, or clumps, for fall delivery, $\$ 3$ per doz., $\$ 22.50$ per 100

## SINGLE LARGE-FLOWERING VARIETIES

Homestead. Rich pink, yellow center.
Ida K. Skiff. Brilliant bronzy amber. Extra fine.
Jupiter. Rose, shading to pink, orange center.
Lady Smith. Pink; scented bright green foliage.
Ruby King. Ruby-red; extra fine; gray foliage.
Wm. H. Waite. Shell-pink; large and very beautiful.

## JAPANESE ANEMONE-FLOWERED VARIETIES

Pepita. Pale pink outer petals, orange-yellow center.
Snow Queen. Long snow-white petals, yellow center.
Wee Wah. Rich terra-cotta, shading to bronzy yellow fluffy center powdered with gold.

## DOUBLE LARGE-FLOWERED VARIETIES

Billiancourt. Brilliant terra-cotta.
Brune Poitevine. Rich glowing crimson, overlaid gold.
La Danube. Pure pink; rich green foliage; early.
Lillian Doty. Finest pink Pompon; vigorous grower.
M. Rux. Burnt orange-salmon; grayish foliage.

Mrs. Francis H. Bergen. Creamy white, center shaded rosy pink.
Mrs. H. Craig. Yellow overlaid with brilliant scarlet.
Pacific Supreme. White, changing to rose. Charming.
R. Delafield. Terra-cotta, scarlet shadings.

White Doty (White Lillian Doty). Very vigorous.

## SMALL BUTTON-SHAPED VARIETIES

Brown Betty. Maroon-red.
Diana. White; green foliage.

Fred Peele. Lilac; scented foliage.
Klondike. Yellow, compact blooms.

# Water-Lilies and Aquatic Plants 

## Hardy Nymphaeas

Marliacea albida. A vigorous variety. Flowers Iarge, of sparkling whiteness, stamens light yellow, sepals flushed pink; fragrant and produced freely and continuously through the season. Very desirable and handsome. \$1 each.
Marliacea carnea. Similar to the preceding, save in color, which is of a soft fleshpink, deepening toward the base of the petals. $\$ 1.25$ each.
Marliacea chromatella. A free and vigorous grower. Flowers 4 to 6 inches across, bright canary-yellow, stamens deep yellow; Ieaves deep green, beautifully blotched with brown. \$2 each.
Marliacea rosea. Resembles N. Marliacea carnea in habit and growth; flowers large, deep rose-color; young leaves purplish red, changing to deep green. One of the best for cutting. $\$ 2$ each.
Tuberosa rosea. Flowers of an exquisite shade of pink, 4 to 5 inches across, standing well out of the water. $\$ 1.25$ each.
Tuberosa Richardsonii. Flowers white, 6 to 8 inches across, forming with its numerous petals a perfect globe when fully open. $\$ 1.25$ each.

## Miscellaneous Aquatics

ACORUS japonicus variegatus (Variegated Sweet Flag). One of the finest variegated plants in cultivation. 35 cts . each, $\$ 3.25$ per doz.
CRINUM americanum. A native plant of the Florida swamps. It produces its Iarge, white, very fragrant blooms in umbels of six to eight. Grows in any kind of soil, but must be kept wet. 50 cts. each.
CYPERUS alternifolius (UmbreIIa PaIm). A very attractive plant for growing in small pools or in moist ground. 20 and 30 cts. each.
EICHHORNIA crassipes major (Water Hyacinth). An interesting floating plant, with dark, Iustrous leaves and delicate, rosy lilac flowers on large spikes. 20 cts. each, $\$ 2$ per doz.
MARSILEA Drummondii. A very pretty subaquatic plant with foliage resembling a four-leaved clover. Grows very quickly. 35 cts. each.
SAGITTARIA japonica fl.-pl. The double-flowering Arrowhead. Very desirable for planting in tubs or on margins of ponds and streams. 65 cts . each, $\$ 6.25$ per doz.

## Hunt's Perfection Plants

## Bedding Plants

MARCH, APRIL, MAY, AND JUNE DELIVERY

## ANTIRRHINUM (Snapdragon) <br> From $21 / 4$-inch pots, $\$ 1.50$ per doz., $\$ 12$ per 100

Defiance. Semi-dwarf plant; orange or russet red in color.
Nelrose. Flowers close together on flower-spike, deep pink in color.
Silver-Pink. (Buxton's.) The flower-spikes are of good length, and the growths are straight.

## ALOYSIA

Citriodora. Lemon Verbena. Well known and valued for the odor of the foliage. $21 / 4$-inch pots, $\$ 1.35$ per doz., $\$ 9$ per 100 .

## ALTERNANTHERA

From 21/4-inch pots, $\$ 1.25$ per doz., $\$ 9$ per 100
Bright foliage plants of dwarf habit. Used extensively for edging and design bedding. Aurea nana. Bright yellow foliage; the most compact variety. Brilliantissima. Red and yellow in color, with broad leaf. Strong grower.

## COLEUS

From $21 / 4$-inch pots, $\$ 1$ per doz., $\$ 7$ per 100
Firebrand. Bright maroon.
Golden Bedder. Golden yellow; the old original, true to name. Verschaffeltii. Standard crimson.

## DRAC ENA

Indivisa. This variety of Dracæna is used extensively as a center plant for vases and for porch and window-boxes. From 4-inch pots, $\$ 6$ per doz., $\$ 45$ per 100; 5-inch pots, $\$ 9$ per doz., $\$ 65$ per 100.

## GERANIUMS

3 -inch pots, $\$ 3.50$ per doz., $\$ 25$ per 100 ; 4 -inch pots, $\$ 5$ per doz., $\$ 35$ per 100
Alphonse Ricard. Bright vermilion-scarlet; Iarge florets and immense trusses.
Beaute Poitevine. Beautiful shade of salmon-pink, delicately shading to white; Iarge, splendid trusses.
Berthe de Presilly. Bright silver-rose-pink; the flowers are fuIl and of perfect form; trusses large and freely produced.
Comtesse de Harcourt. Pure white flowers, with beautiful florets and enormous trusses which stand the sun weII; perfect habit; deep, rich green foliage.
S. A. Nutt. The color is a handsome, dark, velvety scarlet, with maroon shading; a vigorous, compact grower, with a clean, healthy constitution.

## Superintendents', Gardeners', and Farmers' Situations

We have at all times the names of practical and thoroughly reliable men in want of situations. If parties desiring such will write us, we shall be glad to put them in communication with men whom we deem suitable. We make no charge for this servise.
